EDUCATION

- **MS (Computer and Data Sciences) – Aug, 2023 – May 2025**
CASE Western Reserve University, Cleveland, OH, USA.
- **B. Tech (Computer Science Engineering) – Aug, 2016 – Oct 2020**
R.K Valley, RGU, AP IIIT, Andhra Pradesh, India

EXPERIENCE

Phenom People Pvt. Ltd, Telangana, India

Jan 2022 – August 2023

Role: - Product Development Engineer -1

- Using rasa.ai, we have developed an HR AI virtual assistant bot. This bot can display jobs to the user, resolve user queries/FAQs, prescreen him, and schedule an interview with a recruiter. It can even show job recommendations based on user interests.
- Using RESTful web services, i developed GET, PATCH and DELETE API's to update bot messages for client specific requirements. This is mostly reduced manual work of implementation team/customer when they want to configure client specific messages in the bot for specific client.
- customized job alerts feature flag developed which will help client when he wants to enable/disable feature.
- Worked on text to refer feature which is bot service but through mobile text, and have knowledge whats app messages automate through python predefined functions.
- Worked on regular expressions to support client specifics emails and mobile numbers.
- Hands-on experience in developing micro services using python sanic framework.
- understanding of CI/CD pipeline.
- Working experience with A/B testing and events.
- Written multiple scripts for to update bot messages and maintaining proper structure and to remove trailing spaces and so on.
- Worked on multiple experiences Employee experience (web, text to refer-sms, ms teams) platform and candidate experience (web, facebook, text to apply-sms) platform.
- Developed gig feature to support gig manager should not apply to gigs he created. Gigs small jobs that are internal to company.
- I have been involved in the complete SDLC life cycle - Designing, Coding, Testing, Debugging and Production Support, also in Agile Software Development (by following Scrum and JIRA board).
- Designed best solutions to support the client requirements across the platform.
- I am part of tech grooming and technical discussions and tech talks within team.
- Continuous collaboration with product team to understanding the product requirements.
- experience with pytest for unit testing, sonar lint and pylint for code quality.
- Experience with karate framework for API automation for all of services for bot team i have written API automation which reduces QA work by 50 percent.
- **Tools and Technologies used:**
RASA.AI stack, API Gateway, Sanic, REST API, Jenkins, GIT, MongoDB, SQL, Data Analysis, Machine Learning, Problem Solving, Analytical and Critical Thinking, Data Structures & Algorithms, Python, Chatbot Development.

Achala IT Solutions Pvt Ltd, Telangana, India

Apr 2021 – Dec 2021

Role:-Associate Software Engineer

- Developing API's to get the user information
- Had familiarity with Schedulers.
- Worked on back end for banking project to develop multiple features.
- **Tools and Technologies used:**
Java, Spring Boot, MongoDB, PostMan, Spring Tool Suite tools.

CERTIFICATIONS

- Microsoft Technology Associate for Programming using python (verify 2Yeq-XMRJ)
- Python Data Structures by Coursera
(<https://www.coursera.org/account/accomplishments/verify/3AGF54HZ552C>)
- Implementation of Data Structures completion certificate by IITB(<https://certificate.iitbombayx.in/downloads/f9854e3de16140bbb1c58b265c55068b/Certificate.pdf>)
- Algorithms completion certificate(<https://certificate.iitbombayx.in/downloads/0a86299f176b43d69f7738fa9e7ff8f2/Certificate.pdf>)
- Object Oriented Programming completion certificate by IITB
(<https://certificate.iitbombayx.in/downloads/265e493658a949af9bafecb41033460b/Certificate.pdf>)
- Data Engineering Nano Degree by Udacity (confirm.udacity.com/KRZYJN4F)
- Data Streaming Nano Degree by Udacity (confirm.udacity.com/DZW7QKKG)
- Data Structures and Algorithms Nano Degree by Udacity (confirm.udacity.com/HQ2ADGJA)
- Programming for Data Science with Python by Udacity (confirm.udacity.com/5VXECYSV)

SKILLS

- **Programming Language:** Python, Basics of java, Basics of Java Script
- **Database:** SQL, Mongo DB
- **Frameworks:** Sanic web framework, Rasa AI framework, Karate Framework(API automation).
- Data Structures, OOPS
- Software Development Life cycle

OPERATING SYSTEMS and TOOLS

- Windows, Linux/Unix
- Android Studio
- Jupyter Notebook
- PyCharm, VS code, IntelliJ.
- Postman, MongoDB Compass
